### ACADEMIC PROJECTS

- ❖ **StudyNotion (Ed-Tech Website)**

**Description:** StudyNotion is an educational technology (Ed-tech) platform that enables users to register, browse courses, and access video learning materials. Designed with a user-friendly interface, it provides secure authentication, personalized dashboards for both students and instructors, and a seamless shopping cart and payment experience.

**Technologies Used:** React, Redux, Tailwind CSS, Node.js, Express, MongoDB.

**Key Features:** User Authentication, Student Dashboard, Instructor Dashboard, Course Details & Categories, Shopping Cart & Payment Integration, Mobile friendly and Responsive Design.

- ❖ **E-Commerce Cart Website**

**Description:** This is a simple shopping cart application built with React. Users can add and remove items from the cart, view the total price, and proceed to checkout. It's a responsive app that provides a smooth and interactive user experience.

**Technologies Used:** React, Tailwind CSS, Responsive Design.

**Key Features:** Add to Cart, Cart management, Real time price calculation, User friendly design.

### ACHIEVEMENTS / HOBBIES

- **Achievements:** Completed a **Full-Stack Web Development Certification** by Love Babbar.
- **Hobbies:** Dancing, Reading.
